

# Timber Pest Basics

This **non-accredited** short theory course has been designed as a refresher for Timber Pest Inspectors/Managers or for office staff who engage with customers and technicians and need to understand Timber Pest Inspection & Control processes and operations.

When clients are experiencing or are concerned about timber pests in their home, your assurance and industry knowledge on timber pest inspection and control processes and operations can help assure them that your company can help ease their burden.

In this theory only course you will learn or refresh your knowledge on:

- Understanding the treatment application practices for controlling timber pests and timber pest activity that impact on the health, safety or amenity of persons or environments.
- Assessing the nature and extent of the timber pest and timber pest activity
- Analysing the situation
- Preparing an inspection report on managing the timber pest activity.
- Reviewing existing reports relating to pest activity at the premises and designing, implementing, and monitoring a management plan to control timber pests
- Selection of equipment, chemicals, materials, and methods.
